

To whom it may concern,

I would like to purchase the equipment in the requisition associated to this letter. The requisition is for the purchase of an equipment for the pull testing of wire bonds, important for the construction of novel detectors for HEP experiments that my lab is building. The detectors are being built as part of a collaboration with other domestic and international institutions. To ensure consistent results across collaborators it is important that all sites operate the same make and model of this equipment. The make and model chosen by the collaboration are the ones in the associated requisition. Let me know if you have any further questions.

Regards,

Frank Golf, Assistant Professor of Physics

A handwritten signature in black ink, appearing to read 'Frank Golf', with a stylized flourish at the end.
